APRIL., 1908.

No. 4

EDITORIAL NOTES.

Notice!

Do not forget the State Society meeting.

Coronado, April 21st, 22nd and 23rd.

Railroad rates, one fare going, one-third fare returning.

Be sure and get a receipt certificate when you buy your going ticket.

Be sure and have this receipt-certificate signed by the Secretary at Coronado.

No stop over will be allowed going, but the return ticket will be good if used within fifteen days.

By all means attend this meeting; you will regret it if you do not.

Look over the program which appears in this issue.

Each month we publish, in the back pages of the JOURNAL, a list of the changes which have come to our attention during the

ADDRESS previous month. Unfortunately, UNKNOWN. it seems to be a characteristic of

the physician that he forgets to leave a new address when he moves, and he has devised the only working perpetual motion proposition! Therefore you will see in these lists (and please, *please* look for them!) many names of those who have moved to parts unknown. Undoubtedly most of these new addresses could be supplied by other physicians, and that is why we call the matter to your attention and ask your co-operation. Just glance through the list each month and when you see the name of a man listed as whereabouts unknown, and you happen to know his proper address, drop us a line to that effect. It will be of great help to us and to the members of the Society who frequently write to us for the address of some physician who is in this "address unknown" class. Will you not aid us?

The completed program of the coming meeting of the State Society, which will be held at Coronado, April 21st, 22nd and 23rd,

A GOOD PROGRAM. will be found on another page and is worth your careful consideration; it offers subjects of great and general

interest presented by many men whose words will command the respectful attention of all. The Committee on Scientific Program has devoted no small amount of time and work to the securing and arrangement of this material, and the result is worthy of the effort. Now it is up to the members of the Society to attend the meeting in goodly numbers and discuss the subjects presented. The President has given his assurance that he will strictly enforce the time limit, thus avoiding the long and tedious experiences that are only too common with all learned societies, and all writers have agreed to present their remarks within a ten-minute limit. If possible, arrange to be at Coronado Monday and attend the meeting of the Public Health Association, which promises to be of unusual interest. Much attention is to be given to matters of public health and sanitation, this year, and surely no subject could be indicated that is of greater importance.

The statement furnished by the United States Public Health and Marine Hospital Service of the

number of cases of smallpox in the various states, is interesting; you will find it on another page. A contagious

SMALL-POX. disease which is so easily, safely and cheaply controlled, has no excuse for existence and should be either stamped out or kept down to an insignificant minimum; yet we see it steadily increasing in a number of states. In California far too many cases are reported and we ought to consider it rather as a disgrace that this should be so. In every portion of the state vaccination should be
